Life Long Ago Workshop

Life Long Ago Workshop

Education Group's Dinosaur Workshop brings prehistoric life into your school. We take the children back millions of years to discover the wonder of the dinosaurs. Children become part of a paleontological excavation site, locating and identifying replica fossils from some of the most iconic dinosaurs of the past. They will encounter a Tyrannosaurus Rex, Stegosaurus, Triceratops and a few other surprises.

We provide replica fossils, tools and a trained facilitator to explore with your young fossil hunters. Your children will learn about each dinosaur's habitat, diet and location. This workshop is suitable for all ages and is an excellent addition to a science or history week.

Our life-size animatronic Tyrannosaurus Rex is the most dynamic interactive learning experience you'll ever see!

Discover how these huge ancient reptiles - some ferocious hunters, some gentle giants - ruled the Earth for 160 million years.

In addition to our Dinosaur Workshop, a limited number of schools may request a visit from our life-size Tyrannosaurus Rex. Our dinosaur is modelled on puppets from the BBC's 'Walking with Dinosaurs' live show, with animatronic features and a realistic roar. This is the most dynamic interactive learning experience you'll ever see!
